Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3, 13, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barry (US 5,857,998) in view of Kusleika (US 6,733,474).

Barry discloses a balloon catheter having a shaft 30, an expandable balloon 300, and a pouch 310 disposed at least a portion of the balloon and being adapted to receive an agent when the balloon is not expanded. The pouch 310 is a porous material. However, Barry is moot to the material that it is made of.

Kusleika teaches that it is known to use ePTFE in balloon catheters for delivering drugs (figure 13) since it has a natural porosity. Given the teachings, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Barry's pouch with Kusleika's ePTFE balloon material since Kusleika discloses that this material is good for delivering drugs through it.

Allowable Subject Matter

3. Claims 2, 4-12, 16, and 17 are allowable over the prior art of record.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3763

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
